

# TCSS 343 - Week 3

Jake McKenzie

August 4, 2018

## Divide and Conquer

“Common misconception that *fun* is relaxing.  
If it is, youre not doing it right.”

...

Iain Banks

“When writing code, its often the case that you end up computing a value that the calling function doesnt currently need. Later, however, this value may be important when the code is called in a different situation. In this situation, you should obey the law of useful return: A procedure should return all the potentially useful information it computed.”

...

Alexander Stepanov

“Do those things that incline you toward the big questions, and avoid the things that would reduce you and make you trivial.”

...

George Saunders
